

# Animal Transport Program Q3 Impact Report

# 231

**Animal Transfers  
Were Facilitated**

While we continue to experience a need for transfers, our network partners weren't able to assist with as many transfers during this quarter, which limited our ability to accept large transfers.

## Bissell Pet Foundation

Jasper is an affectionate sweetheart who is extremely loving and snuggly. He loves to play and loves attention. He was transferred into our care from Toronto Animal services to receive treatment for ringworm – an annoying, but treatable, fungal condition. Because he's such a cuddle bug, he already has a hold for adoption and will move into his forever home as soon as he is medically cleared.

# 17

**Animals Were  
Transferred to  
Network Partners**

To increase our lifesaving capacity Toronto Humane Society will facilitate the transfer of animals and place them into the care of our Transport Network Partners.

## Carolina and the Mario Crew

Carolina was approximately 4 weeks pregnant when she made the trip from Anderson County PAWS in South Carolina to Toronto Humane Society. This adorable 1-year-old Rottweiler mix with a smile from ear to ear had many staff and volunteers fall inlove with her.

Carolina was placed with Colleen, a loving foster mom, who was ready to give her all the support and comfort she would need to bring her puppies into this world. But after going into labour and having a stillborn baby, Carolina was given a c-section by Toronto Humane Society veterinarians.

On June 6th, 2022, Carolina gave birth to 10 puppies. Sadly, one passed away soon after. With the help of her foster parent, Carolina and her puppies - Mario, Luigi, Rosalina, King Boo, Yoshi, Toad, Bowser, Toadette and Troopa - are growing stronger and bigger every day.

## Bissell Pet Foundation

On Saturday, June 11th, 9 dogs and 4 cats, along with 3 more dogs that were sent to Upper Credit Humane Society, arrived from Texas with the help of Bissell Pet Foundation. These animals came from Palm Valley Animal Society in Edinburg, Texas.

They recently discovered black mold in one of their buildings so have been scrambling to find placements for everyone – we were happy to be able to assist during a crucial time.
