

Veterinary care like no other.

Public Veterinary Service Q1 Impact Report

182

TNR Surgeries Provided

Our Trap Neuter Return (TNR) program, ensures that community cats are given support to improve their wellness so they can live whole and healthy lives. This service is provided free of charge to caretakers.

Working Together to Help an Elderly Man

Mike* recently became Finn's pet parent. However, when Public Health Toronto notified him that Finn needed to get his rabies vaccine, he did not know what to do.

A caseworker at Dixon Hall offered to help Mike by providing him and Finn transportation to Toronto Humane Society's Public Veterinary clinic.

Our clinic gave Finn his rabies vaccine at a fully subsidized rate. It was wonderful to see how three organizations came together to support the health and welfare of Finn and his pet parent.

915

Surgeries Performed

This includes \$1,067.00 worth of public subsidy that was provided during the months of January, February, and March.

Subsidy funding helps make essential veterinary care more affordable, which in turns helps more pet parents in our community care for their pets and keep more families together.

Helping a Stray Cat and Her Kittens with an Affordable Solution

Monica* recently rescued a stray cat who ended up being pregnant and gave birth to two kittens – a male and a female. She wanted to keep them all and get them all spayed and neutered, but once she was quoted \$1,100, she needed to find an affordable alternative.

She booked three appointments at Toronto Humane Society's Public Veterinary clinic. Although she ended up paying full price, it was still much more affordable than her original quote.

Supporting a Toronto Humane Society Alumni to Afford Care

Buddy* is a previously adopted dog from Toronto Humane Society. He has a lot of medical issues and currently on five different types of medication for diabetes, hip dysplasia, and arthritis.

His pet parent reached out to our Public Veterinary Service for support with medication – everything was adding up and it was becoming overwhelming. Our clinic provided them with diabetes medication at a fraction of the cost with an ongoing relationship with her vet.
