

Veterinary care like no other.

Public Veterinary Services

Q2 Impact Report

42

TNR Surgeries Provided

Our Trap Neuter Return (TNR) program, ensures that community cats are given support to improve their wellness so they can live whole and healthy lives. This service is provided free of charge to caretakers.

Keeping Maude and Snow Together

Maude* spent all night at an emergency clinic with her dog, Angel*, because she was experiencing pregnancy pains. Sadly, she could no longer afford to provide Angel with the emergency surgery she required – so with a heavy heart she took Angel to Toronto Humane Society to surrender her.

Our intake department reached out to our Public Veterinary Services to see if we'd be able to accommodate the emergency surgery. Dr. Minter performed an exam and determined that an emergency spay would resolve the issue and keep Angel in her loving home.

The surgery was a success and Angel has been happy and healthy at home ever since.

348

Surgeries Performed

This includes \$8,858.54 worth of public subsidy that was provided during the months of January, February, and March.

Subsidy funding helps make essential veterinary care more affordable, which in turns helps more pet parents in our community care for their pets and keep more families together.

Supporting Matthew's Emotional Support Dog

Matthew* has an emotional support dog who needed a neuter appointment for him to travel to care for his sick grandmother. After monitoring our website for a while, he couldn't secure a spot.

He reached out to our Public Veterinary Clinic and explained his timely situation. The team put Matthew's dog on a priority list and he was neutered the following week.

A Surprise Pregnancy

Candice* recently adopted a cat from a private rehoming. After a short while, she found out that new hew cat was pregnant and gave birth to four kittens.

One of the kittens had a tail injury and required amputation. Our Public Veterinary clinic was able to provide that tail amputation during the cat's neuter and vaccines appointment. Candice also booked appointments for her cat and kittens a few days later.

142

Wellness and Preventative Service Appointments Provided

This also includes \$34,653.23 worth of public subsidy that was provided.

These appointments include microchipping, flea and tick preventatives, vaccinations, euthanasia, and Heartworm prophylaxis.

4

Dental Services

In April 2023 we reopened our Dental Care service. This service provides preventative dental care, such as teeth cleaning.
